Keating report to the state board of health discloses the fact that there were nine cases of contagious disease reported to him during December, as follows: Tuberculosis 3. measles 2. diphtheria 3, and typhoid fever 1. Considering the very open weather that has prevailed for the greater part of the month, the number of cases is unusually small and in a number of instances the disease was only mild. How Kermit Got His Leopard.

In one of these beats they put up a leopard, and saw it slinging forward ahead of them through the bushes. Then they lost sight of it, and came to the conclusion that it was in a large thicket. So Kermit went on one side of it and McMillar on the other, and the beaters approached to try and get the leopard out. Of course none of the beaters had guns; their function was merely to make a disturbance and rouse the game, and they were cautioned on no account to get into danger. A pleasant watch meeting was held Friday evening at the Swedish Lutheran church on Oak street. There was a large attendance and after supper had been served an excellent entertainment was given until the New Year was ushered in.

But the leopard did not wait to be driven. Without any warning, out he came and charged straight at Kermit, who stopped him when he was but six yards of with a bullet in the forepart of the body; the leopard turned, and as he galloped back Kermit hit him again, crippling him in the hips. The wounds were fatal, and they would have knocked the fight out of any animal less plucky and savage than the been served an excellent entertainment was given until the New Year was ushered in.

A Candid Doctor.

Physicians and lawyers are sometimes charged with protracting profitable "cases" through months, and perhaps years, that could have been disnosed of in a few days or weeks. One medical man, who had no temptation to that kind of practice, was frank enough to take advantage of the impeachment, and put the blame where it belonged. A lirdy was very solicitous about her health. Every triffe made her uneasy, and the doctor was called immediately. The doctor was a skillful man, and consequently had a large practice. It was very disagreeable to him to be so often called away from his other cases for noting, and he resolved to take an opportunity of letting the lady observer a red spot on her hand, and at once sent, for the doctor. He came, looked at her hand and said:

"You did well to send for me early." The lady looked alarmed and said:

"You did well to send for me early." The lady looked alarmed and asked: "Is it dangerous, then?"

"Certainly not," replied the doctor. "Tomorrow the spot would have olsampeared and I should have lost my fee for this vist."—Youth's Companion.

The new rectory for St. Mary's parish has been finished and is being occupied, being a decided improvement to that locality.

At Taftville, the new convent of the Sacred Heart paris is nearly completed and the new parochial school is closed in. These handsome, modern buildings are of brick and will cost nearly \$50,000.

The Allen-Beeman company has made extensive changes at their plant, equipping it for a refrigerating plant, and installing two large refrigerating machines for the cooling of their plant. There are many others which have contributed to the general increase in business for the building trades and the outlook is particularly pleasing to them. Norwich has opportunity for the continuance of this building activity and it is possible that 1910 will make as good a showing.

Clothes and the Man.

"You can talk all you please about clothes making a man," said a Walnut street tailor, "but I want to say right now that the smartest clothes in the now that the smartest clothes in the world can't make a man 'natty' if he is not naturally so. There is an old stoop-shouldered doctor uptown that I have been tailoring for seven years. He buys four and semetimes five suits a year. And yet, except for a few days after he has broken in a new suit, he never looks nice. The trousers bag at the knees, the coats fall away in front, and the shouders begin to look sloppy. The man's drooping figure and the poor care he takes of his clothes furnish, of course, the explanation. Did you ever notice the average college man's clothes? Almost invariably he locks neat and correct, despite the lege man's clothes? Almost invariably he locks neat and correct, despite the easy swing with which he walks. But you'll notice that he carries his head high his shoulders fairly erect, and his trousers never break at the shees, so that the crease is always preserved. All classes of men go to college—rich and poor. Few college men take more than fair care of their clothes. It's all the way they wear their colthes, I think. Notice the young lawyers and dectors around town, too. Few of them can afford the very best in tailor-made clothes. That they usually look nice is due to the fact that they have picked up the distinguished way to wear clothes. I might call it. Clothes make a man, but only when the man is willing to help."—Philadelphia Record.

"Now, my little boy, I suppose your father said he would give you something if you pulled out all those weeds?" asked the old gentleman, over the fence, to the lad in the garden. "No," was the feeling reply. "But pop said he'd give me something if I didn't pull 'em out!"—Yonkers Statesman.
